RE: Model 5000/Many-to-One Solution

Dear Ron,

Thank you for working with us to deploy the Model 5000 and the related Many-to-One technology. As you know we completed testing and initial deployment with your Model 5000. Before initial deployment we tested under multiple operating systems including Microsoft Windows, Linux, and FreeBSD. We have been able to easily run concurrent mirrors with several Model 400 and Model 500 clients. As part of our qualification process we also were able to accomplish multiple restores from the Model 5000 to both MiraLink Model 400 and 500 devices. We were pleased to see that this product included an intuitive user interface so that we had an easier time managing the system in our data center.

Thanks again for your support in deploying this unique service provider solution.

Sincerely,

A handwritten signature in black ink, which appears to read "Eric Schmidt". The signature is fluid and cursive, written over a light blue horizontal line.

Eric Schmidt
